

## **Connecting our Community**

In September 2018 The National Lottery Community Fund invited projects that have received funding through its small grants programme to say what they had achieved and how they would like to develop their project or work further. The National Lottery Community Fund, ITV and STV shortlisted five projects in each region to go forward to the public vote and Ramsey Neighbourhood Trust, the LTO for Ramsey Million was one of these. For more information please see the document attached and to download the film showing how they are tackling social isolation, use the link below.

The proposal was to support people at risk of social isolation by offering activities and delivering courses and workshops. The group will help residents improve skills in areas of their lives such as recycling/upcycling household items, growing vegetables, looking after livestock and preserving food. The group will also give people the opportunity to meet other residents through Community Cafes.
